SUPPLEMENTARY INFORMATION:

Authority for this Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class D airspace, Class E surface airspace, Class E airspace area designated as an extension to Class D and Class E surface airspace, and Class E airspace extending upward from 700 feet above the surface at Waterloo Regional Airport, IA, to support instrument flight rule operations at this airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: “Comments to Docket No. FAA-2020-0708/Airspace Docket No. 20-ACE-14.” The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by:

Amending the Class D airspace at Waterloo Regional Airport, Waterloo, IA, by updating the name (previously Waterloo Municipal Airport) and geographic coordinates of the airport to coincide with the FAA's aeronautical database; and replacing the outdated term "Airport/Facility Directory" with "Chart Supplement";

Amending the Class E surface area Waterloo Regional Airport by updating the name (previously Waterloo Municipal Airport) and geographic coordinates of the airport to coincide with the FAA's aeronautical database; and replacing the outdated term "Airport/Facility Directory" with "Chart Supplement";

Amending the Class E airspace area designated as an extension to Class D and Class E surface airspace at Waterloo Regional Airport by removing the extensions east, south, and southwest of the VORTAC, as they are no longer needed; adding an extension within 1 mile

each side of the 128° bearing from the Waterloo Regional: RWY 12-LOC extending from the 4.3-mile radius of the Waterloo Regional Airport to 4.4 miles southeast of the Waterloo Regional Airport; amending the extension north of the VOR/DME to the 356° radial (previously 351° radial); and updating the name and geographic coordinates of the Waterloo Regional Airport (previously Waterloo Municipal Airport) and the name of the Waterloo VOR/DME (previously Waterloo VORTAC) to coincide with the FAA's aeronautical database;

And amending the Class E airspace extending upward from 700 feet above the surface at Waterloo Regional Airport by removing the extension southeast of the airport, as it is no longer needed; adding an extension 2.4 miles each side of the 313° radial of the Waterloo VOR/DME extending from the 6.8-mile radius of the Waterloo Regional Airport to 7 miles northwest of the Waterloo VOR/DME; adding an extension 2.4 miles each side of the 356° radial of the Waterloo VOR/DME extending from the 6.8-mile radius of the Waterloo Regional Airport to 7 miles northwest of the Waterloo VOR/DME; and updating the name and geographic coordinates of the Waterloo Regional Airport (previously Waterloo Municipal Airport) and the name of the Waterloo VOR/DME (previously Waterloo VORTAC) to coincide with the FAA's aeronautical database.

This action is due to an airspace review caused by the closure of runway 6/24 at Waterloo Regional Airport.

Class D and E airspace designations are published in paragraph 5000, 6002, 6004, and 6005, respectively, of FAA Order 7400.11D, dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class D and E airspace designation listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly

and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.
